

CARING FOR FAMILIES
SINCE 1942

Boyer Children's Clinic

Tiny Stars Parent-Child Playgroup (10-20 months)

Our classes are based on an inclusion model where children with and without disabilities can learn and grow together. We offer a safe and caring environment for children ages 10 to 20 months. In this creative environment, instruction is individualized and tailored to each child's needs. Tiny Stars supports holistic development and building social skills together while having fun!

Tiny Stars Parent-Child Playgroup includes a weekly, one-hour session consisting of group activity experiences in a structured setting including music /story time, free play, snack time, gross motor movement time, and parent education topics. Each week, the toys and materials vary to facilitate curiosity and active exploration, and to reflect the unique child interests and needs of each group.

At Boyer Children's Clinic, we believe:

- Every child is capable of learning, making friends, and developing independence
- Parents and the community are essential partners in the lifelong learning process
- Children learn social, self-help, pre-academic & communication skills through guided play
- Learning is the most meaningful when it is relevant and fun
- Our playgroups are a great stepping stone to preschool

Our Staff:

Each Tiny Stars playgroup is staffed by a **Master's-level certified teacher** and a teacher's aide or instructional assistant. All staff members hold a CPR and First Aid certification. With our highly qualified staff, we are able to design activities and environments that meet each child's needs while capturing their interest and excitement.
